

A Journey of Passion and Commitment

As we approach the milestone of 30 years in business in 2025, it's a moment to reflect on the journey that has brought us here. Interface Systems SA was founded in 1995 with a simple vision to re-define the way businesses interact with information, creating a future where data-driven decisions lead to unprecedented success. Very early on we made a significant change when we decided that hardware was not our future and so began our software journey in document creation and management.

From our humble beginnings, we faced challenges that tested our resolve. As recently as the early 2000's there was some difficulty in coaxing customers away from paper as they were uncertain around the legality of a PDF invoice. Customers clung to the familiarity of a physical document and were suspicious of the 'new-fangled' processes, particularly post the Dot Com bubble. The passage of time resolved that issue, but the momentum of change from traditional ways was picking up, as it continues today.

“A SIMPLE VISION TO RE-DEFINE THE WAY BUSINESSES INTERACT WITH INFORMATION, CREATING A FUTURE WHERE DATA-DRIVEN DECISIONS LEAD TO UNPRECEDENTED SUCCESS.”
